DETAILED ACTION

1. This action is responsive to Applicants' communication of 28 December 2006.
2. Claims 1-20 are pending in the application.
3. The 102 rejections have been withdrawn following applicants' amendment.

Claim Objection

The amendment (claims 18-20) filed 28 December 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the following words in claims 18-20 added new matters to the specification; in claim 18, line 1, the word "layer", in claim 19, line 1, the word "layer", in claim 20, line 2, the word "layer".

The word layer is not in the specification. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Wu et al., {US 2002/0165275 same as US 6,656,971}.

Art Unit: 1621

Wu et al. disclose applicants claimed compound as shown below. See compound in column 56.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al., {US 2002/0165275 same as US 6,656,971}.

Applicants claim a diaminobenzene derivative of the general formula 1; wherein all the variables are as defined in the claims.

formula 1

Determination of the scope and content of the prior art (M.P.E.P. §2141.01)

Wu et al. teach diaminobenzene derivative of the general formula 2, see column 56.

formula 2

Ascertainment of the difference between the prior art and the claims (M.P.E.P. §2141.02)

Wu et al. diaminobenzene derivative differs from the instantly claimed diaminobenzene derivative in that the diaminobenzene derivative of formula 2 is a derivative of the instantly claimed compound of the general formula 1. Specifically, applicants claimed diaminobenzene derivative of the general formula 1 reads on diaminobenzene derivative of Wu et al. when the variables n is 0, and the substituent on the monocyclic group is a fluorine atom, chlorine atom or bromine atom.

Finding of prima facie obviousness--rational and motivation (M.P.E.P. §2142-2143)

The instantly claimed diaminobenzene derivative would have been suggested to one of ordinary skill because one of ordinary skill wishing to obtain polyimide precursor or a polyimide is taught to select the diaminobenzene derivative from the genus of Wu et al.

One of ordinary skill in the art would have a reasonable expectation of success in practicing the instant invention by varying the substituents (a fluorine atom, chlorine atom or bromine atom) on monocyclic group to arrive at the instantly claimed diaminobenzene derivative. Said person would have been motivated to practice the teaching of the reference cited because it demonstrates that diaminobenzene derivatives are useful in organic reactions. The instantly claimed invention would therefore have been obvious to one of ordinary skill in the art.

Allowable Subject Matter

Claims 2-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
